**ALL TECH IMAGING REAL ESTATE PHOTOGRAPHY PRICING PACKAGES**

When we come to do your shoot we will provide a UAS Licensed Pilot as required by the FAA. We will post the required NOTAM's (Notice to Airmen) with the FAA and bring an FAA registered high definition drone to the location for the shoot. Remember that we are required by the FAA to fly only under VFR (Visual Flight Rules) conditions so weather might have an influence on scheduling. If you or the Realtor cannot make it to the shoot that will not be a problem, but we ask that you provide the property owner information that we will be doing the photo shoot. Once the photo shoot is finished we will process the photos and videos, then email them directly to you. You will be able to then upload them directly to the MLS if needed. If you are going to use some of the photos for print advertising then just let us know and we will send you high resolution copies for print ads.

**Payment**

We accept Visa, MC. We will contact you by phone confirming your photo shoot date and time. At that point you will need to provide a credit card for us to use as payment. On the day of the scheduled shoot the credit card will be charged before our pilot arrives at your location. If any extras are agreed to at the shoot any additional amounts will be charged the day of the shoot. Once we have a comfortable working relationship we will be able to offer you or your brokerage firm terms on upcoming shoots with billing.

FAA Commercial UAS Drone licensing brings a super brand new and exciting dimension to aerial photography. With the extreme high cost of renting full-size aircraft and more added expense of hiring pilots. We will come directly to your place and lift off our small radio controlled drone in a safe area to quickly photograph your project. We personally shoot all of the aerial drone photography and video.

This pricing information is for all general aerial photography utilizing our small lightweight Drone aircraft. Including Commercial, Residential, Industrial, Inspections, Events, Tourism and much more... Extreme High Resolution JPEG photos/ TIFF/ EPS/ PSD/ RAW files up to 4000X2250 image files are available! These prices are based from the North Idaho area. Travel more than 60 miles will require additional travel and time expense. Please note we are limited by FAA Regs to 3-5 mile radius around airports as a "no-fly zone" also a maximum altitude of 400 feet. Most Drone photography are usually photographed at an altitude of 50 - 250
